

## RX805 Outdoor Rock Speaker

---

The RX805 Outdoor Rock Speaker is a team favorite at OSD for its natural look and excellent sound. This speaker has an 8-inch polypropylene woofer and 1-inch dome tweeter that provide excellent high and low notes. The RX805 will have no problem filling large backyards, pools or patios and is very natural looking. Place these speakers anywhere a natural rock would be found and you'll hardly notice them (until you turn these speakers on). Typical locations for the rock speakers are rock formations for barriers around pools, ponds and spas, bordering a garden and even as an accent in flower gardens.
