

## NERO IWLCR 55 In-Wall Speaker

The Nero IW LCR55 in-wall LCR (left, right, center) trimless speaker is an elegant and discreet option for adding left, center, and right speaker channels to any type of sound system. The dual Kevlar-cone woofers produce the deepest, full bass tones with smooth mid-frequency roll-off, while the 1" aluminum dome tweeter gives you, high-clarity, distortion-free sound at the high end. The IW LCR55 is capable of handling up to 160 watts so it can be paired with all AVR's. The two-part mounting system allows you to install the mounting frame and grille before adding the speaker. This keeps the speakers clean during the installation process, and makes custom painting the grills much easier.
